PRECISE, SIMPLE, COMPLETE

CNC BRIDGE SAW

UNPRECEDENTED QUALITY AND FINISH

The **SPIN 625 CNC** is a **5 interpolated axis** simple and compact bridge cutter, ideal for the production of kitchen tops, vanity tops, shower trays and claddings for the building industry in marble, granite and artificial stone.

It allows to perform several types of processing such as orthogonal cuts up to 200 mm thickness, oblique, circular, elliptical, inclined, together with milling, drilling and straight, concave, convex, arched or elliptical shapes.

The **SPIN 625 CNC** is equipped with inverter-controlled electro-spindle and is fitted with diamond tools, such as an end mill, excavation wheel and

horizontal blade. Thanks to X and Y axes sliding system on linear guides with recirculating balls and racks with hardened and ground steel teeth both with automatic centralized grease lubrication, the **SPIN 625 CNC** allows to obtain finished products extremely fine and precise. The motion is given by brushless motors coupled to high precision gearboxes.

It is supplied complete with a series of optional and hot-galvanized monoblock structure that does not require foundations, allowing installation and start-up in a very short time.

**COMPLETE
SOLUTION**

**EXTREMELY
COMPACT**

**PRECISE CUTS
AND SHAPES**

**SIMPLE AND QUICK
TO PROGRAM**

**WIDE RANGE OF
PROCESSING**

**NO NEED OF
FOUNDATION**

**EASY TO
TRANSPORT AND
TO ASSEMBLY**

**PERFECT BALANCE
BETWEEN DIMENSIONS
AND REALIZATION
FLEXIBILITY**

PROCESSING

Kitchen tops, vanity tops, floors, panels for external and internal claddings, stairs steps, window frames, shower trays, building products.

QUALITY WITHOUT COMPROMISE

MAIN FEATURES

DONATONI

SPIN
Z
X

Control panel with a digital display showing numerical data and various control buttons.

Axis	Position	Target
X	1731.0	1731.0
Y	-1617.0	-1617.0
Z	60.4	60.0
A	34.2	34.0
B	32.0	32.0

- / 5 INTERPOLATED AXES
- / Z-AXIS STROKE: 400 MM
- / BLADE DIAMETER MIN / MAX: 400-625 MM
- / MAXIMUM CUTTING DEPTH: 200 MM
- / MAXIMUM LIFTING WEIGHT WITH SUCTION CUPS: 300 KG
- / AUTOMATIC CENTRALIZED GREASE-LUBRICATION OF SLIDING GUIDES
- / NORMALIZED, SANDBLASTED AND PAINTED STEEL STRUCTURE
- / BRUSHLESS MOTORS AND HIGH-PRECISION GEARBOXES CONTROLLED BY INVERTER FOR X-Y-Z AXIS SLIDING

OBLIQUE CUTS

STRAIGHT, CONCAVE, CONVEX, ARCHED, ELLIPTICAL SHAPES

INCLINED CUTS 0-90°

ORTHOGONAL CUTS UP TO 200 MM THICKNESS

A COMPLETE PACKAGE IN A SINGLE MACHINE

STANDARD COMPONENTS

High quality electro-spindles controlled by an inverter allowing the adjustment of the nr. of revolutions from 0 to 5500 rpm, so granting the use of blade and diamond tools such as a core drill or milling cutter. The tool change is of manual type.

Monoblock structure composed of supporting walls and supporting beams of the tilting bench, all in sandblasted steel and painted in triple layer with normalized structure.

Tilting workbench with hydraulic lifting system, available in wood or rubber (optional) with maximum capacity up to 1650 kg.

Blade presetting unit: measurement system of blade diameter.

Slab thickness detector: system for automatic detection of slab thickness, for use with a max. 525 mm. blade diameter.

Front and rear guards: front and rear protections with double locking allen key system. The closures have the possibility by folding opening so allowing a smaller footprint.

Laser marking

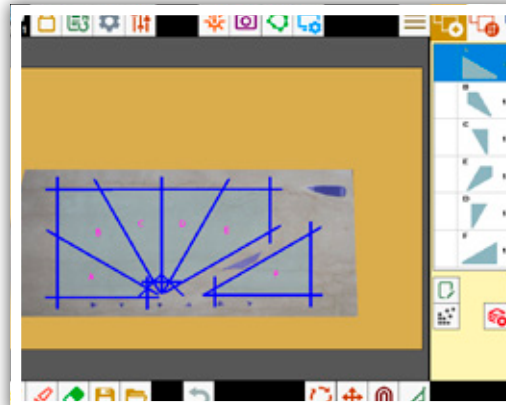

ACCESSORIES AND MECHANICAL COMPONENTS OPTIONAL

Photoslab: slab detection system, with camera placed above the working bench and image acquisition software. The application allows to speed up machine programming, pieces positioning and slabs defects detection.

Tools +: vertical lateral electrospindle managed by inverter with nr. 0-14,000 rpm, allows the operator the use of small diameter diamond tools with 1/2" gas connection for incremental cutting / blind or through hole drilling and the performance of combined operations with blade and milling cutter.

AN INTELLIGENT SYSTEM TO MAKE YOUR WORK EASIER

LET US DRIVE YOU TOWARDS
AN INTELLIGENT CHOICE OF
MACHINE

D-INSIDE:

EQUIP YOURSELVES WITH
A SUPERIOR FORM OF
INTELLIGENCE

OPERATOR INTERFACE WITH PC AND 15" VIDEO

COLOUR TOUCH-SCREEN

PRECISION OF MOVEMENTS WHICH ENABLES
COMPLEX AND INTRICATE PROCESSING

USB PORT FOR TRANSFERRING FILES

CONTROLS FOR MANUAL MOVEMENT OF AXES

Perfection in the machining is achieved through multiple movements that need perfect coordination between them. While in the human body all movements are managed through brain impulses, similarly in our machines the management of movements takes place through the **integration of the machine with the programming software.**

Every Donatoni machine is born with an intelligent work management system, integrated with all the parts that manages its movements; we call this system **D-Inside**, the real brain of the machine; it is an advanced but simple interface in terms of its usability, even for inexperienced operators, which enables the machine software system to be coordinated.

The D-Inside system offers many programming options and can be interfaced with the different kinds of Donatoni software, such as Parametrix and all additional modules, or the CAD-CAM DDX EasySTONE, in such a way as to make it possible to adapt the machine in the best way to suit the requirements of the customer.

PARAMETRIX

USER-FRIENDLY ICONS AND
SIMPLE PROGRAMMING

Parametrix is the simple and user-friendly Software developed by Donatoni Macchine and conceived to optimize the management of cutting different shaped pieces from slabs.

It is a program allowing to manage cutting processes with blades, it enables input of rectilinear as well as curvilinear shapes (steps, kitchen work-tops, rectangles, covers) using pre-defined shapes in the program or imported from DXF files.

Based on the surface available it is possible to automatically set-up the pieces positioning and the sequence of cuts, so optimizing times and reducing material waste.

The software is including functions such as anti-collision of pieces, manual and automatic pieces nesting, book matching, production and orders statistics management, rendering of pieces and holes.

Parametrix can be combined with Photoslab.

Nesting (included)

Automatically inserts squared or rectangular pieces in the working area optimizing the exploitation of the slab and automatically avoiding highlighted defects.

Drilling and processing with milling cutter (included)

It allows you to manage the use of tools, drills and milling cutters, with which it is possible to cut pieces or parts of the slab, to complete the initial processing with blade, such as "L-shaped" internal corners, or to make reductions for recesses. The change from disc to core during processing is automatically managed by the program.

Positioning of the pieces on the slab (included)

Con la funzione di nesting manuale vengono verificate le collisioni fra i vari pezzi agevolando il posizionamento ottimale. La funzione di "calamita" aiuta l'operatore ad allineare i pezzi uno vicino all'altro per diminuire il numero di tagli necessari. È possibile salvare e riprendere in seguito la configurazione desiderata.

Managing and changing of cuts (included)

After positioning the pieces, cuts can be modified: it is possible lengthen it, to change order of cuts, to disable it, to add pauses; other types of modification before pressing the start button to process the cuts can be made.

Book matching (optional)

Starting from a project in DXF format, it allows to have a 2D image of the parts to be cut and therefore to appreciate before the cut the aesthetic result obtained by the combination of the pieces, evaluating overall and in full the "bookmatching" type processing.

DM_TL (optional)

Program for slabs smoothing / polishing / brushing by means of plate carrying FRANKFURT abrasives.

ISOSAG

ISOSAG is the software allowing to create files for the performance of rectilinear or concave shapes and convex arc both with vertical and horizontal blade. The shaping process can be performed both in roughing (combing) and finishing (brushing) or in combined mode.

The program is supplied with a library of profiles that can be quickly modified in size, by the machine operator and saved as a new profile.

SCAN-CNC

OPTIONAL

Detection system composed of a laser pointer mounted on the machine head, allowing to detect two-dimensional profiles with linear or curvilinear shape. In real time the software creates the drawing (file dxf) on the machine monitor.

Once the detection operation has been completed, the operator can:

- Process the template on the touch screen of the machine using the optional parametrix or easycut, easystone basic or premium.
- Store the template file in the machine's pc archive.
- Store the file on an external pc, using a usb key, to create possible processing and association with other files by using external cad cam software.

PHOTOSLAB

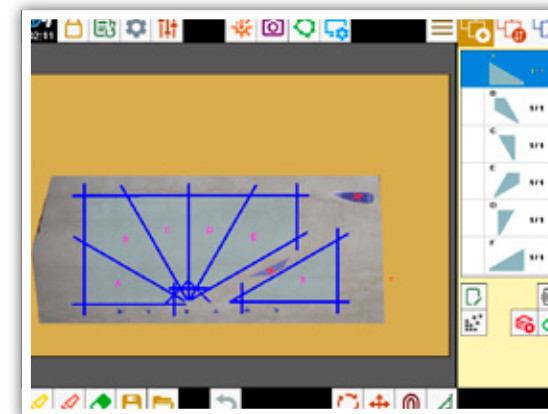

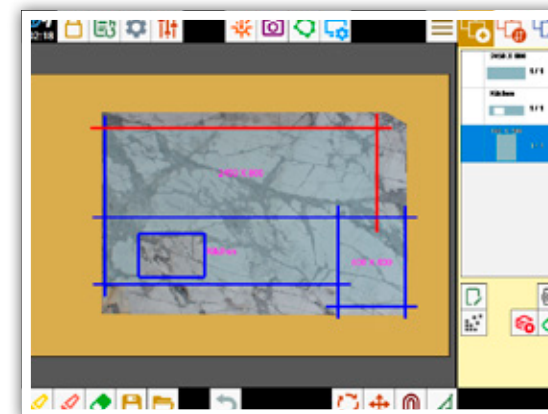

SUPPLIED WITH CAMERA
FOR SLAB

By means of a camera placed above the machine and the related record software, the slab being cut is automatically detected.

The system allows the optimization and the exploitation of the slab dimensions, the speeding of pieces positioning, avoiding possible defects or enabling to perform cuts by following the veins of the material.

The software is automatically enabled with installation of "camera for slabs".

DDX EasySTONE

OPTIONAL

DDX Easystone is powerful, simple and intuitive CAD / CAM software for machines Donatoni.

The software allows to design, import and execute 2D and 3D files in DXF, IGES, STL, PNT, STEP and RHINO formats and to define surfaces and shapes through laser scanning. Multiple processes can be set: roughing, drilling, profiling, emptying and polishing, which can be carried out by optimizing the execution process.

After the import, the software optimizes processing paths, performs roughing / finishing taking into account the raw material resulting after processing.

With EasySTONE it is possible to display the processing 3D image with virtual milling and to modify it if required. The 3D simulation of the processing, including free displacements, is realistic as it is based on the Customer's machine model and shows the three-dimensional model of the working center, of the bench, of the motors, the tools, the sub-pieces and the pieces .

Once the design phase is completed, EasySTONE generates the piece-programs and sends it directly to the Customer's working center.

Finally, it calculates times, lengths and processing costs, allowing accurate reporting of the work performed.

WITH DONATONI YOU ARE NEVER ALONE

AFTERSALES
SERVICE AND ASSISTANCE

The relationship with the customer does not end with the supply of the product but continues and is strengthened through a reciprocal collaboration which creates value for both customer and supplier.

DIRECT CONNECTION WITH OUR TECHNICIANS

MACHINE INSTALLATION

Our machine are installed by highly specialized technicians granting extraordinary levels of professional work. Installation includes a careful installation service, commissioning of the machine and training of operators according to the model of machine installed.

ON SITE ASSISTANCE

We provide on site assistance at the clients premises if not possible to use the Tele Assistance by modem.

CAD-CAM TECHNICAL ADVICE

we help our customers in creating and designing projects and objects.

The commitment to our Customers continues even after delivery of the machine, offering a service of support and aftersales service of utmost quality. For Donatoni Macchine the best service is to supply **efficient and long-lasting machines which require little maintenance and aftersales assistance.**

DIRECT CONNECTION - ON-LINE ASSISTANCE

Each machine is supplied with a system that enables it to be connected by Tele-Assistance to our After-sale service (we require connection to the network via a cable). This service enables our technical staff to virtually access the customer machine and to carry out checks, updates and to provide technical assistance as if they were there at the machine location in person.

PARTS AND REPLACEMENTS SERVICE

We handle requests for parts and replacements in any part of the world, in short time frames in order to minimise machine down-time.

EXTENSIVE SALES AND ASSISTANCE STRUCTURE

Donatoni is present in many countries worldwide thanks to a structure of reliable and competent partners and agents, among which the Biesse group Interamac branches.

We believe that **the added value that we can offer customers is a series of services including technical advice and support and training activities** for operators regarding technical aspects or the software.

THEORETICAL/PRACTICAL TRAINING

Training courses and update courses regarding new applications and software at our offices or at customer premises. Our offices are equipped to host courses for technicians and operators. The rooms are next to the machines on display in our show room and therefore this allows tests and checks to be carried out directly on the console of the machine and the level of learning can be evaluated.

TECHNICAL DATA

Number of interpolated axes	n°	5
Carriage stroke axis X	mm in	3600 141,7

Donatoni Macchine, founded by Vittorio Donatoni in 1959 in Domegliara, one of the main marble and granite processing districts, is recognised, thanks to their years of experience gained in the natural stone industry during this time, as one of the world leaders in manufacturing **cutting-edge machines of very high quality for working stone.**

Constant research, technological innovation and customer service are key concepts for the company and in order to pursue them the company employs highly qualified technical and commercial personnel, in order to guarantee the end customer a **product that reflects their expectations in terms of quality and performance.**
